

COMPLETE CABLING EQUIPMENT (PTY) LTD

CCE 4 CABLE DRUM JACK

Hydraulic jacks are fast and require less physical effort. The basic hydraulic units travel is extended to give a wide range of operating heights. Our jacks are constructed of a high tensile fabricated steel frame. This jack is suitable for all conditions.

The CCE4 is manufactured on order only. A standard lead time of 10-12 working days will be applicable subject to quantities and prior sales. Jacks are only sold as pairs and only CCE jacks will be accepted for repairs. No components will be sold as loose components. The CCE4 jacks can be modified to run on bearings and have been built in the past to accommodate up to 20 tons capacity.

Our range of cable drum jacks have been load tested on numerous occasions. Should you require test certificates please indicate so at the time of order placing as it does affect possible lead times.
