COMPLETE CABLING EQUIPMENT (PTY) LTD

ALL IN ONE COILING MACHINE

The all-in-one hand turned coiling machine was first designed for the medium sized electrical wholesaler. This machine is ideal for decoiling small lengths from a 300 meter drum and will also accept drums used in the cellular communications industry. This machine is capable to coil any form of flexible tubing, rope, hose etc.

The lifting or feeding end is fitted with quick lifting drum jacks to ensure speedy loading and unloading of cable drums. In the center is the cable measuring meter which will measure cable of up to 100 mm diameter. The coiling end is capable of producing cable coils or can be modified to coil on to empty drums of various sizes.

TECHNIAL SPECIFICATIONS

DRUM RANGE	Maximum 2,00 meter diameter X 1,25 meter wide
DRUM WEIGHT	Maximum 800 Kg
MACHINE DIMENSIONS	3,20 meter long by 1,10 meter wide by 1,00 meter high
MACHINE WEIGHT	300 Kg
FINISH	Any standard colour

All-in-one coiling machines are manufactured on order only. The above specifications are for a standard unit and can be modified to meet customer requirements where needed. Normal lead-time for this machine is two to three weeks.
