

COMPLETE CABLING EQUIPMENT (PTY) LTD

HAND TURNED COILS AND STANDS

Hand turned coiling units and frames are custom manufactured to suit customer specifications and customer applications. These units are easy to manufacture with quick turnaround times of 7 to 10 working days. Coiling units are perfect for usage in cable yards, electrical supply outlets as well as wholesalers and retailers. Units are manufactured to be used in coiling cut lengths of cable, rope, hose etc. and can also be used as standard storage drums.

Simply supply us with the following information and we will calculate and propose the best solution for your required application.

- Minimum product outside diameter
- Maximum product outside diameter
- Minimum length expected to cut or store
- Maximum length expected to cut or store
- Manual or motorised application
- Braked or unbraked

Once we have received the information a quote and proposal will be forwarded. Units can be customised to customer specification.

Customers who purchase hand turned coils and stands also look at the following products

- Cable drum jacks
- Cable measuring meters
- Cable racking and shelving
- Cable pulling socks
- Swivels
- All in one coiling machine
