

COMPLETE CABLING EQUIPMENT (PTY) LTD

MOBILE COILER

The mobile coiler was designed to accommodate the need in the wholesale and retail industry where coiling from a racking and shelving system is required. As space is limited in aisles the frame is fitted with braked castors to allow for easy maneuverability in the workplace. When required the mobile coiler is moved to the shelving system, cable is measured, coiled and cut. Once the operation is complete the unit is simply moved out of the way.

The mobile coiler is manufactured on order only. A standard lead time of 3 weeks is applicable.

Customers who purchase the mobile coiler also look at the following products

- Cable measuring meters
- Racking and shelving options
