

## COMPLETE CABLING EQUIPMENT (PTY) LTD

### CLR1 CORNER LAYING ROLLER

Corner rollers are used to ease tension of cable pulling operations by reducing the drag created when pulling cable around corners. The above picture shows four sections locked together. The number of sections required is determined by the radius and length of the corner. Each section consists of three rollers. Sections are locked together by staking pins forming suitable bends to assist continuous winch pulling of cables around corners of trenches and tunnels. These rollers are also suitable to do internal cable pulling in buildings as they can be used vertically or horizontally. Rollers are available in polyurethane and aluminium. Corner rollers are manufactured on order only. A standard lead time of 2-3 weeks from receipt of order is applicable subject to quantities and roller selection.

OVERALL DIMENSIONS	470 mm X 270 mm X 270 mm
MAXIMUM CABLE DIAMETER	120 mm Outside diameter
WEIGHT	8,50 Kg
FINISH	Black powder coating

Customers who purchase cable laying rollers also look at the following products:

- Swivels
- Cable pulling socks
- Cable drum jacks
- Cable drum trailers
- Cable pulling winches
