

COMPLETE CABLING EQUIPMENT (PTY) LTD

CR2 CABLE LAYING ROLLER

Cable laying rollers are generally available ex stock. Subject to quantities a general lead time of 2 weeks on polyurethane rollers and 3 weeks on alluminium rollers would apply should we not have stock. Alluminium rollers are cast on order only and have a minimum lead time of 3 weeks. This is dependent on volumes required and on hand from the foundry. All roller frames can be modified to suit operations for pulling cable in buildings over walls etc. CCE owns all its own moulds which ensure consistent quality and quick turnaround times. Roller frames can be electroplated or hot dipped galvanised. The standard finish is a black powder coated frame.
